

COMPANY PROFILE

SANITARY ENGINEERS

About Us

Sanitary Engineers is a leading provider of comprehensive cleaning. Over the years we have grown our business by relying on word-of-mouth from our existing customers. Our clientele evolved from a single customer to over 20 clients and we are still growing.

Our employees are screened and trained to use all products and equipment. We train them from the basics to the **“special Sanitary Engineers touch”**

We pride ourselves on delivering our clients superb service.

We stand by our commitment to be reliable, trustworthy and attentive to all our clients' needs and requests.

The proof is here: our first client is still with us and our most effective marketing strategy has remained word-of-mouth.

Our core business as sanitary engineers is cleaning services, sanitary services, landscaping, grounds and cleaning detergents supplies.

Our Team

Our team members are fully trained on how to use our products and equipment to ensure that you receive quality cleaning service.

OUR SERVICES

CLEANING SERVICES

Commercial and Building Cleaning Service

Clean premises play a vital role in portraying a professional and reliable of the company. It is necessary to maintain a hygienic environment, keeping in mind that it is also important for the health and morale of your employees. Therefore, regular professional maintenance should be practiced for your office space or the common areas of a building.

Our aim is to be the most preferred professional cleaning service provider for commercial and building cleaning services.

Our span of knowledge and specialization includes general and common areas, offices, toilets, corridors, lifts, carpets, and upholstery. With the commercial cleaning by Sanitary Engineers, your premises will look its best at all times. ***Stay focused on what you do best. Leave the maintenance to us.***

OUR SERVICES

CLEANING SERVICES

1.2 Office Cleaning

Your workplace must also be as clean as your home. While our home is the first place on the list that most of us spend time at. The second place will be our workplace. To achieve a comfortable environment to live in or work at, this can be done by engaging a professional cleaning company.

1.3 Cleaning, Disinfection & Sanitary Disposal

Regular cleaning is a daily activity that can kill only the pathogens that are currently present in that environment. To constantly remain safe so that there will be no new germs, viruses, pathogens that exist and survive in your surrounding environments such as your home or working environment. Engaging professional disinfection experts would be something that you might wish to put into serious consideration.

Disinfecting and sanitizing treatment services will be eliminated these viruses, bacteria and other pathogens as advanced disinfectants products will be used. We use hospital-grade products as the advance disinfectant to get rid of any new viruses and bacteria in a particular environment. We also comply with the appropriate standards to keep your premises virus-free.

SANITARY BIN HIRING AND DISPOSAL SERVICES

We have the right tools for the job at Sanitary Engineers. We offer collection and disposal of sanitary wear through the hiring out of pedal bins, disposal is done in a safe manner. Collection is done as per client's requirements, once or twice a week complemented by bin servicing.

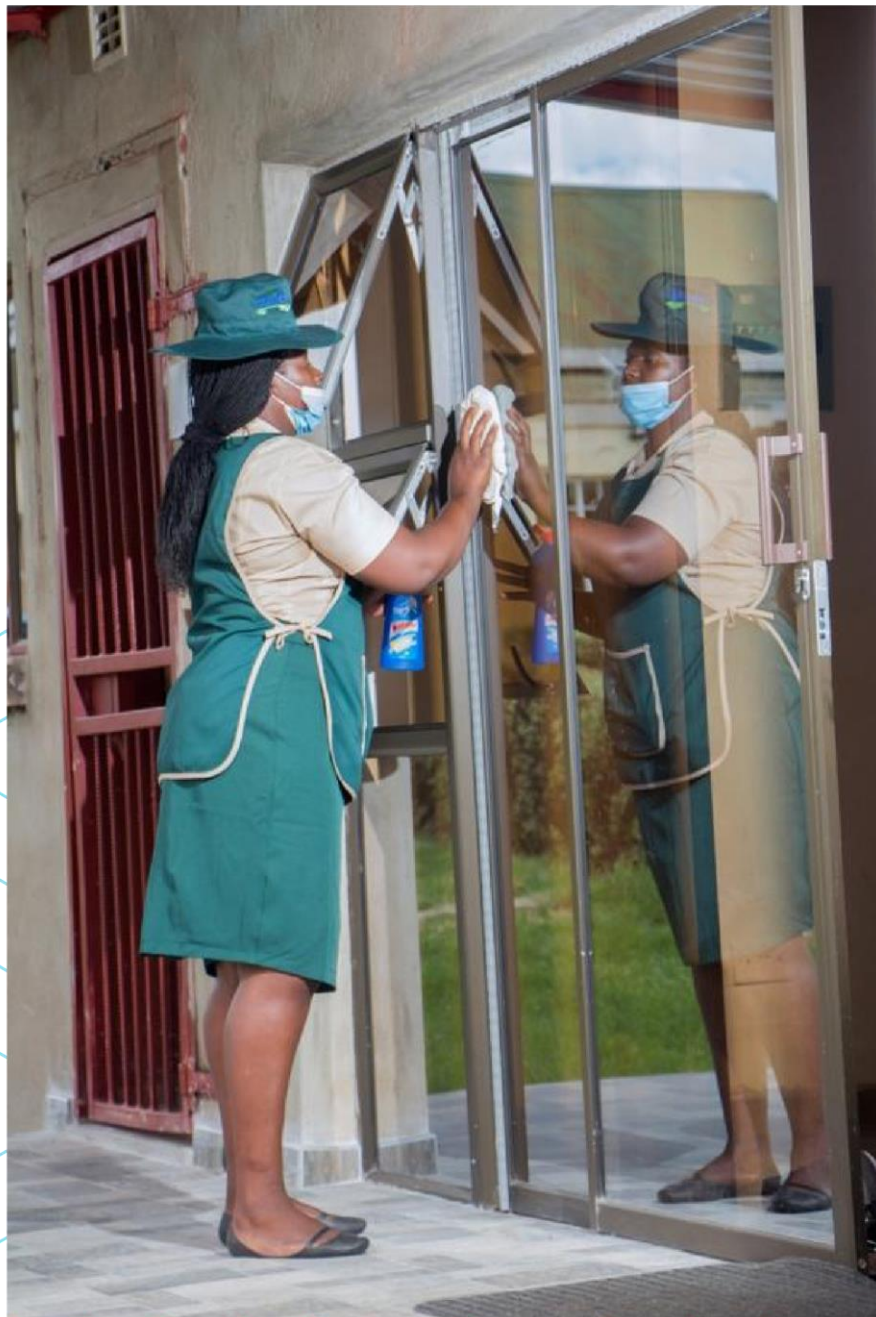

OUR SERVICES

CLEANING SERVICES

Post Renovation Cleaning

Tidying up after a revamp of your premises is not the same as your regular cleaning session. A top-down approach is needed in such situations, going through the cleaning process in a comprehensive manner. After your renovation it is preferable to have a post-renovation clean-up.
